

Front Withdrawal Frames

Hard wearing and airtight, our Front Withdrawal Frames are designed for use in the most demanding operating conditions, including automotive and heavy manufacturing industries.

Choose our Front Withdrawal Frames for a robust air tight filter housing.

THE KEY BENEFITS

- 1 Durable**
Available in galvanised or high stainless grade steel our frames are strong and robust and are designed to handle the highest of air volumes without bowing or buckling.
- 2 Quick installation**
Tension spring or P-clip fastener enables quick and easy filter removal and installation.
- 3 Leak free installation**
Conical stampings enables quick and easy construction and centring allowing precise frame adjustment for a completely leak free air tight solution.
