

# Front Withdrawal Frames

Choose our Front Withdrawal Frames for a robust air tight filter housing

Hard wearing and airtight, our **Front Withdrawal Frames** are designed for use in the most demanding operating conditions, including automotive and heavy manufacturing industries.

## The key benefits

1

### Durable

Available in galvanised or high stainless grade steel our frames are strong and robust and are designed to handle the highest of air volumes without bowing or buckling.

2

### Quick Installation

Tension spring or P-clip fastener enables quick and easy filter removal and installation.

3

### Leak Free Installation

Conical stampings enables quick and easy construction and centring allowing precise frame adjustment for a completely leak free air tight solution.

## Versions
