

Pad Holding Frames

Choose Pad Holding Frames for quick and easy filter replacement

Our range of **Pad Holding Frames** are manufactured from high grade galvanised or stainless steel with the outer framework supported by a heavy duty back-mesh steel grid.

Manufactured in depths ranging from 10mm to 100mm, our frames are designed for use with all types of disposable filter medias, enabling quick and easy filter replacement and saving time, money and reducing waste.

The key benefits

- 1 Reduced Filter Change Cost
- 2 Ease of Maintenance
- 3 Durable Construction
- 4 Air Tight Fit (Fit & Forget)

Applications

- Humid Conditions
- High Air Volumes
- Replacements for standard and non-standard panel filters
- Ceiling filters and areas of limited access
- Spray Booths

Painting & drying technology

Air conditioning & ventilation technology

Fire retardant to DIN53438-3 (F1)
